LIBERATED Overview & Vision

Toolkits Devices **Fabrication ADV-HAT** MX-B Box GUI P.C.B.E.O.W MX-F 2023 Software - R&D Software - R&D Software - Open Source Video input circuit board Development environment for Embeddable web application PC Building At The End Video synthesizer for use with MXB. Open of The World: a auide to backend and engine. MX synthesizer frontends. for designing and customising source KiCad schematics. boxes and ATX PC cases. upcycling PC components. MX-Z P.C.B.E.O.W MX-K Boxes & Cases Software - Open Source Initial RPi-based video Printed and illustrated Programming environment, Custom boxes and cases made synthesizer based on vintage version to accompany starter projects and from recycled materials. 80s/90s video mixers. custom ATX cases. examples that interface with MX-B device. AUI MX-C **ATX Cases** Software - Open Source User interface library & RPi-based video synthesizer Custom PC cases made from re-usable components used with expanded modulation recycled materials. in MX device GUIs. and waveform workflow. A-V-S MX-S 2024 Scanline and pixel-sorting Audio-Visual software based video synthesizer. for Mac / Win / Linux.

Social Goals

Open source tools & resources to nourish experimentation and learning-through-doing.

Code-to-Learn

Using recycled & upcycled materials, technology & processes where possible.

Climate Crisis

Putting long-term sustainability & quality of life before profit.

Future of Work
